Profile

An enthusiastic and committed Backend Developer with 2 years of experience since graduated from State Vocational School 1, Bekasi City. I am experienced in creating and maintaining web applications by utilizing JavaScript, Node.js, Express.js, Ruby, Ruby on Rails and SQL databases.

In my first year of career in the development field, I gained experience with Flutter Development, then I gained more interest in Game Development in my second year of career. Overall, I believe I possess strong problem-solving abilities, adaptability and enjoy both independently and cooperatively in a team. I am dedicated to providing valuable and efficient solutions aligned with business needs.

Education

Mercu Buana University

September 2024 – Present

Bachelor of Computer Science – Informatics Engineering

Jakarta, Indonesia

- Learned fundamental concepts of databases, including design, normalization, and SQL.
- Studied algorithms and data structures to strengthen problem-solving and computational thinking skills.

State Vocational High School 1 Bekasi City

July 2020 – May 2023

Software Engineering

Bekasi, Indonesia

- Learned foundational programming with HTML, CSS, and JavaScript.
- Studied Object-Oriented Programming (OOP) using Java.
- Practiced software architecture using the Model-View-Controller (MVC) pattern with PHP.
- Gained experience in working with SQL databases using MySQL.
- Developed problem-solving skills through project-based assignments and coding exercises.
- Introduced to Git and GitHub for version control in individual and team-based projects.

Experience

PT. Inovasi Solusi Internasional

June 2023 – present

Backend Developer

Jakarta, Indonesia

- Performed bug fixing and API improvements to enhance performance and maintainability of backend services.
- Conducted debugging in various environments to identify and resolve system issues.
- Built and integrated new backend API features based on project requirements.

- Managed deployment processes using Kubernetes and Jenkins in a CI/CD environment.
- Collaborated with cross-functional teams including frontend developers and QA engineers to deliver high-quality software.
- Assisted in the development of a WordPress-based website, including plugin integration and customization.

PT. Brilyan Trimatra Utama

January 2022 – June 2022

Internship Web Developer

Bekasi, Indonesia

- Learned how to build a responsive portfolio website using React.js and Bootstrap.
- Studied the fundamentals of backend development using Node.js and the Express.js framework.
- Explored how to design and create RESTful APIs following best practices in web architecture.
- Participated in a team project to build a frontend website based on UI/UX designs provided by designers.
- Gained experience in working collaboratively within a development team environment.
- Practiced using Git for source code management and version control in a team setting.
- Introduced to NoSQL databases, particularly MongoDB, and performed basic CRUD operations.

Certificates
